3D History for Ukraine

3D History for Ukraine is a measure to take care of Ukrainian heritage in response to cruel and unjust aggression caused by the invasion of Russian army.

The level of digitization of Ukrainian cultural and archaeological artifacts, even the most unique ones, is dramatically insufficient. Therefore, we require quick and robust measures to digitize everything we can as soon as possible.

Our answer — to join efforts gathering donations to buy a hand-held 3D scanner to equip an expert team of brave Ukrainian historians and technicians eager to preserve their heritage

Call for support in safeguarding Ukrainian heritage

We ask for your help and support

1. Becoming a speaker. Join us at the main crowdfunding event on **September 24—25**. We need presenters, who will introduce their topics engagingly and popularly to the widest audience. The event will be held via Zoom and streamed on YouTube

Presenters are invited to give a 20-25 minutes talk online to encourage the audience to support us with their donation

2. Help us spread the word. Do please share this information with your friends and colleagues. Disseminate our social networks and posts to accomplish our important mission together

3. Help us with your donation. Those who can't participate in the event but want to help us are encouraged to make a donation through our GoFundMe platform

What is required

Contact us at
